

## MONEY.

An Interesting Disquisition on the Subject of Money From a Populist Standpoint.

What is it? It is Not Gold Nor Silver Nor Paper. It is Nothing Until the Government

Makes it So By Its Stamp Upon It The Value of Money in Every Country

Is Determined By the Amount Existing. As the Population Increases Money Ought to Increase.

A CHANCE FOR AN ARGUMENT.

PAID, Ky., Sept. 16, 1894.—Editor News.—As you seem to be very fair and generous in permitting an expression of opinion by your readers through the columns of your paper, I ask the indulgence of a small space in which to say a few words on money. I believe this money question to be the most important, the most vital question engaging the attention of the people of the United States to-day. I believe with Hume, the historian, that a shrinking volume of money, falling prices and misery and destitution are inseparable companions. What is money? Money is a legal tender for the payment of debts created by the act of a government of competent jurisdiction. Money is a medium of exchange, but a medium of exchange need not necessarily be money. Money is a measure of all values, for it is in terms of money that the value of all the products of labor and all property is measured. Money is a certificate issued by a government and certifies that the holder is entitled to its face value in any of the products of labor anywhere for sale within the jurisdiction of such government. Money is the creation of sovereignty. All money on whatever material stamped is fiat money. There is not now in existence on earth, never was, and never will be a dollar or any other unit of money that is not fiat money. Gold is not money; silver is not money. Neither is money "till it receives the stamp of a government by lawful authority. Money has no intrinsic value. The belief that money must possess intrinsic value as held by many of our statesmen and Republicans is a blighting superstition instilled into the minds of the masses of mankind by the designing and scheming few who profit by having the people believe it.

Money has legal or denominational value expressed on its face in units. The legal value of money is fixed and arbitrary, and is subject to frequent changes. But the real value of money is its purchasing power, varies inversely as the number of units of money in circulation in any country increases or decreases. As the number of units of money in circulation increases, the purchasing power of the unit decreases, and as the number of units of money or volume of currency decreases, its purchasing power increases.

John Stuart Mill, the great English economist, says, "The value of money, other things being the same, varies inversely as its quantity." If the quantity of money is increased, the value of the unit is lowered, and if the quantity is decreased, the value of the unit is raised in a ratio exactly equivalent.

Hiccup, that whom, perhaps, no greater economist lived in his day says, "The value of money in every country is determined by the amount existing. That commodities would rise or fall in price, in proportion to the increase or diminution of money I assume as a fact that is incontrovertible." The above, so the value of money is called the quantitative law of money. This quantitative law of money is as true as the laws of nature or mathematics and is unchangeable. If the volume of money be doubled in any country, prices will be doubled. If the volume of money be increased one-fourth, prices will rise one-fourth. Again, if the volume of currency be contracted one-half, prices will fall one-half. If the volume of currency be contracted one-fourth, prices will fall one-fourth. Under a governmental policy of contracting the volume of currency the debtor is compelled to pay more than he agreed to pay and the creditor is given more than he agreed to receive. Under a shrinking volume of money or a policy of contraction all debtors and tax payers are compelled to make a greater sacrifice, to part with a greater quantity of their labor products to obtain the money with which to discharge their debt or to pay taxes.

Before the inauguration of such policy of contraction. If the volume of money is contracted 25 per cent. it will require of the farmer 25 per cent. more wheat, 25 per cent. more tobacco or 100 pounds of whatever the farmer has to sell to secure the money with which to discharge his debts and obligations. Where 100 bushels of wheat were sufficient to pay 100 pounds of tobacco would have been sufficient before to secure the money, it will now require 125 bushels of wheat or 125 pounds of tobacco to obtain the necessary sum.

SUBSTANCE OF A SUNDAY SERMON.

Rev. J. R. Crawford preached a sermon on "Gambling" at the Cumberland Presbyterian church Sunday morning that was listened to by a large congregation. He took for his text, Romans 12:12. "The night is far spent, the day is at hand; let us therefore cast off the works of darkness and let us put on the armor of light."

By way of introduction the speaker gave a brief historical summary of gambling, enumerating some of the causes leading to the almost universal prevalence of the vice. He then said in substance: "Gambling is fast becoming a national vice which is sapping the foundations of all business integrity and progress. Like the microbes of a contagion, the game has crept into the very air we breathe. We have it developed in every form from the stupendous transactions of the stock exchange and far-reaching gambling pool to the petty rick and the grab-bag of the fashionable church entertainment. The ambition to get something for nothing and to gain wealth without labor and economy is as prevalent as the air we breathe. It has removed from robbery and theft. Gambling adds nothing whatever to the wealth of society. An estimate based on unimpeachable authority states that during the past year the stakes and purses of American race courses amounted to \$5,000,000 and the betting on the events to fully \$100,000,000. These figures are alarming enough. They reveal a deplorable condition of public morals. Nearly as much money is annually staked upon horse racing as is required to run the national government. In many of our states horse racing has been legalized by statute. Race tracks are licensed and racing and pool selling are protected by official sanction. The money that is lost in the game is lost to the improvement of the breed of horses. We fully endorse the forcible words of the Nashville Christian Advocate, on this subject. Horse racing is gambling. Now that it is gambling with all the attendant circumstances of drunkenness, debauchery and fraud thrown in. Improving the breed of horses, indeed! But what if the money were even so, what about the breed of men?" The exciting and spectacular character of the race course, and the social element in it, makes it more alluring and worse than the lottery.

Carlyle tells us that there are but three ways of making a living, work, begging and stealing. Gambling clearly falls under the third head. ## SIROCCO.

Under cover from last week, Rev. Cowley, the late addition to the Baptist church of whom mention was made a short time ago, visited brother Argyle during the last week of his progress. On Friday night he, brother Cowley, discussed from Hab 2, chapter 3, Subject, "How shall we escape, If we neglect as great a salvation?" Using several graphical illustrations he handled the subject with interest to the entire audience leading them into a wide field of thought. One of his illustrations pictured an exile left to languish on a far-away, desolate island. In sympathetic tones he pictured the intensity of the man's desolation. A ship bores in sight touches the island, will the whinnical advantage of the opportunity, accept the plan of deliverance at hand, step on board the inviting craft and be wafted to home and friends? Or will he in his weakness cry: "Go, ship, go thy way, some more convenient day On thee I'll call."

Saturday night the home was crowded to its utmost capacity, in fact, it was that number failed to find seats and repaired outside to the windows and doors. On Sunday, his last sermon, he preached on Romans by immersion and handled the subject in a way to impress the idea to those who were not acquainted with his past life, that he had passed the most of almost three score and ten years laboring in the Baptist faith. Of whatever else he can be said of Rev. Cowley, he is certainly a well read and well posted man so far as sacred history is concerned. He is somewhat of a speculative thinker, carries one into fresh fields of thought, never thought without a connecting link to the realistic. With such a five of commanding rhetoric he on Sunday carried his message into a sphere where they seemed never to have reached before, utterly oblivious to every thing passing around him, some of the congregation fell in his arms and shoulders drooped forward and eyes fixed on the speaker with an attentive gaze that never saw manifested in the days of his life. Before he had finished his sermon they pulled themselves together and looked around manifesting a great curiosity as if they had just awakened from a dream in which they were lost to the whimsicalities of the present perverse generation.

## TOWNSHIP, IND.

Wm. Winchel went to the Indiana State fair last week. W. R. Polk went to Louisville's Mill Tuesday on business.

The work on Mort Grove's home is being pushed to completion. On account of the dry weather very little wheat ground is yet broken.

Reuben Reynolds was the guest of his daughter, Mrs. Jeff Hawkins, last week. Mrs. Rolt, Lamb and Little son, H. M. of Batesville, are visiting here this week.

Curt Ryan's little five year old girl has been very sick with fever, but is improving now.

Marion Weatherholt, of Iolo, Ky., accompanied by two ladies attended church here last week.

Capt. Wm. Weatherholt met with some impediment in putting down his "drive well," and was compelled to abandon the job.

"Jack" Allen built a cooper shop and is now making barrels for the trade. We wish him well in his new undertaking.

The Democratic candidate for Congress of this district spoke at Cannetown Tuesday night. The following went from here to hear what he had to say: Jim Fagless, Waldo Simons, Alvin Ryan and Tom Layton.

Elder R. T. Bruner preached his farewell sermon to this people at the Baptist church Sunday night. He read for the evening lesson Paul's farewell address to the church at Ephesus, after which he preached a very touching discourse and to the effect that as far as he had went he had not shunned to declare the whole counsel of God. After preaching, the parting land was extended to him while the choir engaged in singing "Iod be with you 'till we meet again." This closed a three year's pastorate with the church at this place.

It May Do as Much for You. Mr. Fred Miller, of Irving, Ill., writes that he had a severe kidney trouble for many years, with severe pain in his back and also that his bladder was affected. He tried many so called kidney cures but without any good result. About a year ago he began use of Electric Bitters and found relief at once. Electric Bitters is especially adapted to cure of all Kidney and Liver troubles and often gives almost instant relief. One trial will prove our statement. Price only 50c. for large bottle. At A. F. Fisher's drug store.

An Entertaining Cognition. The Owensboro Inquirer says—Mr. Harris, the Cloverport gravel man has invested largely in the Spottsville gravel field and has a bed there that is seemingly inexhaustible. He is endeavoring to induce this city to adopt his gravel and proposes to lay two or three squares on one of our thoroughfares with his gravel and guarantee against repairs for a period of three years. True we are going to have vitrified brick on our streets, but it might be well to let Mr. Harris try his experiment on a side street, say McFarland. The council's attention is called to Mr. Harris' proposition.

THAT MAN GUFFY.

Do the Republicans in this county know anything of the political history of that man Guffy, who beats their record for Judge of the Court of Appeals. If they don't, we'll give it to them. And it is as true as holy writ. Here it is:

In 1868 Mr. Guffy was the Republican elector for Gen. Grant against Horatio Seymour. Grant was elected and Guffy went on to Washington to attend the inaugural and made application to President Grant for appointment as Federal Judge of one of the Western Territories. Grant refused to appoint him. He might have done so if he had not seen him, but as soon as he saw him and heard him talk, he saw he was not a man for a position like that. Failing to get the office, Guffy fell out with Grant and with the Republican party and left it and went over to the Greenback party. He allied with it as long as it lasted; but when the Greenback party died out, he stood neutral, voting sometimes for Democrats and sometimes for Republicans until the Populist party sprang up, when he became a radical Populist and at once constituted himself one of the leaders of that party. In a contest for the People's party at Cincinnati in the spring of 1891, the Kentucky delegates got together and nominated a ticket for all the state offices for Kentucky from Governor down to Register of the Land Office. Guffy being one of the delegates, he was nominated for Attorney General. He accepted the nomination and made a canvass to try and win it, and he lost it. But he was so overwhelmingly defeated that he concluded he had no show for office in that party and he left and went back to the Greenback party that he had been denouncing on the stump since 1868, while he belonged to the Greenback party. On one occasion at Monticourt, Ky., where he resides, he had a full suit of clothes made of green calico—coat, pants and vest and dressed up in it and went around canvassing for the Greenback ticket. We are sorry to say that he was a lieutenant before the war and would be one now. If he thought there was any chance for him to get an office by becoming one. We have great respect for a good soldier, a substantial Republican, when we believe in the honest and conscientious in his views, but we have no sort of patience with a man like Guffy. He doesn't deserve the support of any party. Will the Republicans of this county, knowing his history, take any stock in him? We think not.

This Democratic Committee of the Seventh Congressional District met at Frankfort last Saturday and formally announced the result of the recent primary. It was declared the nominees over Breckenridge by 255 votes. Breckenridge accepted the result and will make no fight.

FIRE IN HENDERSON'S CITY, MISS.

Monday's Owensboro Messenger says: A fire in Henderson about 1 o'clock Sunday morning completely destroyed the three-story brick building on Main street, owned by Henderson. The building was a store. A number of other buildings were seriously threatened with destruction, but the citizens, aided by the fire department, after an hour's work saved the rest of the city. To-day mail brought us a letter from the "Sun of Southland" asking if we could tell who the writer of news and comment on things in general from Stephenson, for the Leader.
